

Tire and Appliance Disposal

This is Dave from Vilas County Zoning & Planning with a message about tire and appliance disposal.

—

In addition to being an eyesore, old tires and appliances are hazardous when disposed of improperly. Tires are a fire hazard, and both provide breeding grounds for disease-spreading mosquitos. Do we really need more mosquitos in the Northwoods?

When the time finally comes to get new tires, or to replace that kitchen appliance, make sure that the old ones are disposed of properly. Many tire retailers offer disposal of old tires, and most appliance retailers will haul away your old appliances as well.

If you can't take advantage of these services, Vilas County offers a voucher program to dispose of unwanted tires and appliances at the Highway G Landfill. Contact your local municipal clerk or Vilas County Zoning & Planning to obtain a voucher.
