Subject: Exemption from Electrical Licensing for persons installing wiring and equipment associated with a POWTS System

Ss. 101.862(4)(p) A person engaged in installing, repairing, or maintaining a private on-site wastewater treatment system, as defined in s. 145.01 (12), if the activity only involves installing or modifying a conductor going from the system’s junction, pull, or device box to the nearest disconnecting point and the conductor is buried with the system.

POWTS Wiring System

- You CAN:
- Lay all the cables in the trench with the system piping.
 - Attach the junction box to the manhole riser at the POWTS system.
 - Install any electrical wiring or equipment within any tank for the POWTS.
 - Connect all conductors associated with the POWTS system within the junction box at the dose chamber.
 - Connect all conductors associated with the POWTS system to the nearest disconnecting means at the house. The nearest disconnecting means is the first disconnecting means the POWTS system cables are connected to either at or within the house or other building served by the POWTS system.

No Electrician’s License Required
